

Project Manager

Ertech Pty Ltd is a privately owned civil contracting company that has built a proud record over its twenty nine years in business as an employer providing excellent growth opportunities and rewards in a positive, team oriented and safety focused environment.

With over 550 employees, an impressive client list covering the resources, infrastructure and land development sectors and an enviable safety track record we strive to be Australia's best civil construction company and deliver our projects right and on time.

Responsible to: General Manager

Position Summary

This newly created position is the result of the sustained expansion of our field operations. This role will successfully and independently deliver complex projects safely, on time and on budget in alignment with the Ertech Way.

Position Description

Responsibilities will include, but are not limited to:

- Leading project teams
- Effective use of resources and capabilities to deliver required project outcomes
- Plan, schedule and deliver projects in line with project plan
- Internal and external stakeholder management
- Review of contract variations
- Monitoring project performance against objectives and project plans
- Maximising profitability in accordance with company operations procedures which include safety, environmental and quality
- Adhering to Ertech's safety standards and environmentally responsible work practices

To be successful in this position your background will include:

- Tertiary qualifications in Engineering
- Experience in managing site based construction, Oil & Gas and/or mining operations
- Demonstrated record of making a difference in a similar role
- A willingness to get your hands dirty
